

# Weight Based Fertigation and Irrigation

## Scale Unit

- High-precision weight sensor
- Measures plant weight, dry-back, and runoff
- Assembles in seconds
- Commercial dishwasher safe
- Eliminates placement bias of substrate sensors

## Flourish Unit

- Plug-and-play installation
- IP66+ waterproof enclosure
- Ethernet ports for scale connectivity
- Integrated power supply and internet connectivity
- Optimize fertigation per plant, table, or room

## Software

- View and manage your grow from anywhere
- Configure fertigation exactly how you want it
- Trigger irrigation based on real-time substrate mass change
- Quantify intraday wet weight gain
- Predict yields using actual plant behavior data
- Unlimited users

## Don't just grow, Flourish

- Increase yield by 10%+
- Scientific accuracy

- Reduce overhead costs
- Gather actionable data on your grow
